Education

2021 - present	Bachelor's Degree at **SRM University AP**	(GPA: 7.8/10.0)
2021	Class 12th BIEAP at **Pavitra Co-Op Jr College**	(887)
2019	Class 10th ICSE at **St. Francis English Medium High School**	(492/600)

Skills

Technical Skills: HTML5, CSS, Flask, Node.js, Express.js, ReactJS, MongoDB, SQL, MS SQL Server, EF Core, Git, GitHub, Docker.

Programming Skills: Python, JavaScript, C++, C#.

Work Experience

Interned at Techwave Consulting India Pvt Ltd Jun 2023 - Aug 2023

- Developed and deployed machine learning models for predictive analytics, enhancing decision- making processes and increasing forecasting accuracy within three months using Python and TensorFlow
- Conducted extensive data analysis and preprocessing for machine learning models, resulting in reduction in error rates and improved model performance

Interned at Cognizant Jan 2025 - present

- Gained hands-on experience in C#, EF Core, ASP.NET Core (MVC), Web API with EF Core, React, Git, MS SQL Server and SOLID principles while developing a project for scalable software solutions
- Designed and implemented a full-stack web application, leveraging modern frameworks to enhance efficiency and maintainability

Projects

Campus Connect link

- Developed an anonymous chat application for students from various universities facilitating cross-university communication for knowledge exchange and networking.
- Enabled secure login using organization email addresses to ensure user privacy and data protection by using Firebase for authentication
- Utilized React.js for building a dynamic and responsive user interface.

Lease Management System

- Developed a full-stack lease management platform enabling property owners to list properties and tenants to lease via secure payments
- Implemented authorization and authentication using JWT tokens while leveraging SQL Server features like stored procedures and triggers for digital lease signing
- Designed a user-friendly, responsive and intuitive UI with React.js, including a notifications for seamless updates and interactions

Auto ml link

- Developed a user-friendly AutoML tool for streamlined Exploratory Data Analysis (EDA) and model training.
- Enabled efficient data uploading, robust EDA, and machine learning model training for regression and

classification tasks.

Layman's GPT (currently working) link

- Created a simple yet effective platform that allows seamless interaction with locally hosted language models, enabling users to communicate with AI in an intuitive manner.
- Integrated vector storage solutions to enhance the model's ability to remember and recall past interactions, leading to a more personalized and context-aware user experience.

ACTIVITIES

Full Stack Club - Executive Member

Led and actively contributed to the planning and execution of club activities related to full stack development. Designed the distinctive logo for the club, successfully hosted 2 engaging offline webinars.
